Summit-multi

Don't let the small size fool you. These ENERGY STAR® qualified units pack a lot of power and energy savings into each versatile design. Multi-positional means they're right for any job. Their compact size lets them fit where others won't, even accommodating today's larger hi-seer a-coils.

FRONTIERS OF SAVINGS

We're pleased to offer a number of options on our multi-positional series, each offering new levels of comfort and savings while continuing to incorporate all the great features that have kept Kerr customers happy for over 30 years.

The series EVO incorporates Kerr's EVO control system for steady, even comfort. Our new EVO series offers cutting edge fan motor control compared to conventional furnace technology. The EVO TRUE air modulation provides improved heating, cooling and dehumidification for a comfortable home.

Go all the way and step up to our MAX Series.
Our MAX series features all the benefits offered with the EVO series, but goes one step further by incorporating our Kerr ECM technology. Not only will you be living in greater comfort, our ECM technology will provide utility cost savings on your heating/cooling bills year after year.

Kerr stands behind every product it sells and carries one of the best warranties in the business.

UNITS AVAILABLE WITH:

Beckett RIELLO BURNERS

SHOWN WITH RIELLO BURNER.
ALSO AVAILABLE WITH AFG OR NX OIL BURNER.

Added Savings with

KERR ECM™

A net utility bill savings of up to $320/yr* can be realized when using constant air circulation.

(@ 11¢/ kW/h) of a GE ECM motor when compared to a conventional blower motor. Your actual savings will vary depending on your climate, ductwork, insulation, thermostat setting, and energy cost.
*GE – Regal Beloit Energy Savings Calculator

NOTE: The above figure is based on the average energy savings.
